DETAILED ACTION

Allowable Subject Matter

1. Claims 1-32, and 34 allowed.
2. The following is an examiner's statement of reasons for allowance:
Regarding claim 1, and similarly claims 17, 23, and 34, the prior art of record does not expressly disclose:

determining an amount of data in a data buffer of each of the user equipments;

comparing the amounts of data in the data buffers of the user equipment to obtain a relative indicator, **the relative indicator indicating how full one of the user equipments data buffer is in comparison to the data buffers of the other of the user equipments; and**

selecting a base station as the active base station for the one user equipment based on the relative indicator.

Although VADGAMA discloses determination of cell congestion and selection of cell based on the determined congestion, VADGAMA does not providing a relative indicator indicating how full one of the user equipment is in comparison to the data buffers of the other of the user equipments and selecting a active base station for the one user equipment based on the relative indicator. Furthermore, while NAIM discloses transmitting to a base station the amount of data in the data buffer of each of the user equipment, this information is used to determine uplink bandwidth allocation and not

used for selection of an active base station for one of the user equipments based on a comparison of other of the user equipments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
